PROFESSIONAL SUMMARY

NOC Engineer who keeps backups healthy, works RMM alert queues down to zero and closes patch and vulnerability findings. Hands-on with Veeam backup jobs and restore tests, NinjaOne style RMM alerting, Windows patching, VMware and Hyper-V, and ticket ownership from alert to close. Experience in IT operations at GNB Global and Intelligenie. M.S. in Computer and Information Sciences from the University of North Texas, EC-Council C|CT.

TECHNICAL SKILLS

Monitoring & Analysis: RMM (NinjaOne), ScreenConnect, Alert Tuning, Prometheus, Grafana, Wireshark

Systems: Veeam Backup and Replication, Restore Testing, 3-2-1 Backups, VMware vSphere, Hyper-V, Windows Server

Security: Patch Management, Vulnerability Remediation, EDR and Antivirus Health, CMMC Basics, Microsoft Defender for Endpoint, Conditional Access

Networking: TCP/IP, IPv4/IPv6, IP Addressing, Layer 2 Switching, Layer 3 Routing, VLANs

Tools: HaloPSA, Hudu, IT Glue, Jira, Confluence, Git/GitHub

Network Automation: Python, Ansible, Netmiko, Paramiko, Socket Programming, PowerShell

PROFESSIONAL EXPERIENCE

IT Technician & Administrator / *GNB Global Inc.*

Dec 2025 to Present

- Check overnight backup jobs every morning, fix failed and warning jobs, and run file and VM restore tests with written evidence.
- Keep backups on a 3-2-1 pattern with an offsite cloud copy, encryption and set retention.
- Work RMM alerts to root cause: low disk space, antivirus missing or out of date, stopped services such as ADSync, and offline devices.
- Tune alert thresholds so the queue shows real problems instead of noise.

Network & Automation Engineer Intern / *Intelligenie*

Jan 2025 to Dec 2025

- Monitored Windows and Linux servers and network gear for client environments and resolved alerts.
- Wrote Python and Ansible automation for configuration backups, health checks and reports.

Network Engineer Intern / *Toplyne*

Oct 2021 to Sep 2022

- Supported enterprise network monitoring, troubleshooting and day-to-day network operations.

PROJECTS

Network Validation & Automation Toolkit / *Python, Netmiko, Paramiko, Sockets, JSON*

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.

Security Intelligence Platform / *Python, FastAPI, React, JWT, YAML, MITRE ATT&CK*

- Built a platform that reads security logs in JSON, Syslog, CSV and plain text, detects the format automatically and turns them into readable findings.

EDUCATION & CERTIFICATIONS

Master of Science in Computer and Information Sciences / *University of North Texas*

Dec 2024

B.Tech in Computer Science and Engineering / *Lovely Professional University*

May 2022

EC-Council Certified Cybersecurity Technician (C|CT)
