

TULASISAI PECHETTI

Network Engineer

Dallas-Fort Worth, TX | Open to Relocation & Remote | 940-600-3313 | Tulasisaipechetti@gmail.com
[linkedin.com/in/t-sai-pechetti](https://www.linkedin.com/in/t-sai-pechetti) | github.com/tulasisai | tulasisai.github.io

PROFESSIONAL SUMMARY

Network Engineer who builds and troubleshoots VLANs, routing, firewall policy and VPNs, and manages network configuration as code with Ansible and Git. Experience with on-prem server and network operations at GNB Global and Intelligenie, including cabling, rack and stack and hardware swaps, plus monitoring with Prometheus and Grafana. M.S. in Computer and Information Sciences from the University of North Texas.

TECHNICAL SKILLS

Networking: TCP/IP, IPv4/IPv6, IP Addressing, Layer 2 Switching, Layer 3 Routing, VLANs, DNS, DHCP, VPN, Network Troubleshooting, Load Balancers (HAProxy, F5), Network Segmentation, Access Control Lists, Datacenter Cabling, Rack and Stack

Network Automation: Python, Ansible, Netmiko, Paramiko, Socket Programming, PowerShell, JSON, YAML, Ansible, Terraform, Terragrunt, Git

Monitoring & Analysis: Wireshark, Bandwidth/Latency Monitoring, Log Collection, Connectivity Validation, Prometheus, Grafana, Alertmanager

Security: VPN, Microsoft Defender for Endpoint, Conditional Access, MFA, MITRE ATT&CK, NIST

Systems: Windows Server, Windows 10/11, Linux, Active Directory, VMware, Microsoft Entra ID, Intune, Docker, Kubernetes, HashiCorp Vault, Keycloak

Tools: Git/GitHub, GitHub Actions, ServiceNow, Jira, Microsoft Visio, Jira, Confluence, Scrum

PROFESSIONAL EXPERIENCE

IT Technician & Administrator | GNB Global Inc.

Dec 2025 to Present

- Run the office and server network: VLAN design, inter-VLAN routing, firewall rules, VPN access and Wi-Fi for 200+ users.
- Keep switch, firewall and server configuration in Git and push changes with Ansible playbooks instead of editing devices by hand.
- Set up Prometheus, Grafana and Alertmanager to watch link status, bandwidth and device health, and respond to alerts during business hours on call.
- Segment users, servers and guest traffic with VLANs and access control lists to meet security and compliance requirements.
- Handle hands-on data center work: cabling, rack and stack, hardware swaps and basic troubleshooting for servers and network gear.
- Track work in Jira and write runbooks and network standards in Confluence.

Network & Automation Engineer Intern | Intelligenie

Jan 2025 to Dec 2025

- Supported Windows and Linux infrastructure and enterprise networking for client environments.
- Wrote Python and Ansible automation for network validation, configuration backups and reporting.
- Resolved Layer 2 and Layer 3 issues involving routing, switching, VLANs, NAT, DNS, DHCP and VPN.
- Helped configure load balancer pools and health checks for internal web services and documented the setup.

Network Engineer Intern | Toplyne

Oct 2021 to Sep 2022

- Supported enterprise network monitoring, troubleshooting and day-to-day network operations.
- Diagnosed and resolved TCP/IP, DNS, DHCP, VPN, latency and connectivity issues to maintain network performance.

- Developed Python scripts to verify IP reachability, TCP connectivity and service availability, improving validation efficiency.
- Monitored network health and bandwidth utilization to identify and report performance issues.
- Performed Layer 2/3 troubleshooting involving IP addressing, routing, switching and VLANs.
- Worked with senior engineers on incident investigation and root-cause documentation; maintained network inventory records.

PROJECTS

Network Validation & Automation Toolkit / *Python, Netmiko, Paramiko, Sockets, JSON*

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.
- Used SSH-based automation to collect device information and generate structured validation reports, reducing manual verification.

Security Intelligence Platform / *Python, FastAPI, React, JWT, YAML, MITRE ATT&CK*

- Built a platform that reads security logs in JSON, Syslog, CSV and plain text, detects the format automatically and turns them into readable findings.
- Added threat scoring, correlation of related events, MITRE ATT&CK mapping and NIST checks. Deployed it on Railway and Vercel from GitHub.

CERTIFICATIONS

- EC-Council Certified Cybersecurity Technician (C|CT)

EDUCATION

Master of Science in Computer and Information Sciences / <i>University of North Texas</i>	Dec 2024
Bachelor's Degree / <i>Lovely Professional University</i>	May 2022
