

TULASISAI PECHETTI

System Engineer

Dallas-Fort Worth, TX | Open to Relocation & Remote | 940-600-3313 | Tulasaisaipechetti@gmail.com
[linkedin.com/in/t-sai-pechetti](https://www.linkedin.com/in/t-sai-pechetti) | github.com/tulasisai | tulasisai.github.io

PROFESSIONAL SUMMARY

System Engineer with hands-on Linux (Ubuntu, RHEL, CentOS) and server experience, from hardware bring-up and OS installs to troubleshooting hardware, firmware and OS problems. Supports 190+ endpoints and on-prem servers at GNB Global, scripts validation and burn-in checks in Bash and Python, and has worked with NVIDIA GPU systems, Docker and high-speed networking. M.S. in Computer and Information Sciences from the University of North Texas.

TECHNICAL SKILLS

Systems: Windows Server, Windows 10/11, Linux, VMware, Ubuntu, RHEL, CentOS, Server Hardware (CPU, Memory, Storage, PCIe), NVIDIA GPU Systems and CUDA Drivers, BIOS/BMC/IPMI Firmware, RAID, System Bring-up and Burn-in Testing, HPC Clusters

Automation & Tools: PowerShell, Python, Ansible, Git/GitHub, GitHub Actions, ServiceNow, Jira, Visio, Bash, Docker, Kubernetes, Slurm

Networking: TCP/IP, DNS, DHCP, VPN, VLANs, Routing & Switching, Wireshark, InfiniBand, RDMA, 10/25/100GbE

Security: Microsoft Defender for Endpoint, Xcitium Endpoint Security, BitLocker, MITRE ATT&CK, NIST

Endpoint Management: Microsoft Intune, Windows Autopilot, Win32/MSI/MSIX Deployment, Configuration Profiles, Compliance Policies, BitLocker

Identity & Access: Microsoft Entra ID (Azure AD), Active Directory, Group Policy, RBAC, MFA, Conditional Access, SSO, Security Groups, Identity Lifecycle Management

Microsoft 365: Exchange Online, Teams, SharePoint Online, OneDrive, Power Automate, Dropbox Business, Adobe Acrobat, Bluebeam

PROFESSIONAL EXPERIENCE

IT Technician & Administrator | GNB Global Inc.

Dec 2025 to Present

- Install, configure and maintain Ubuntu and Windows servers and 190+ endpoints, including OS builds, driver and firmware updates, and patching.
- Bring up new server and workstation hardware: rack and cable, update BIOS and BMC firmware through IPMI, configure RAID and run burn-in tests before handing systems to users.
- Set up NVIDIA GPU workstations for engineering users, installing drivers and CUDA, and troubleshoot GPU, memory, storage and PCIe faults down to the failed part.
- Write Bash and Python scripts that validate new systems (CPU, memory, disk and network checks) and collect logs for failure analysis.
- Run internal services in Docker containers and monitor system performance, recommending changes to improve stability.
- Write installation procedures and troubleshooting guides, and work with vendors on RMAs and hardware replacements.
- Troubleshoot DNS, DHCP, VPN, routing, switching and VLAN issues across the office and server networks.

Network & Automation Engineer Intern | Intelligenie

Jan 2025 to Dec 2025

- Supported Windows and Linux infrastructure and enterprise networking.
- Developed Python and PowerShell scripts for administrative automation, network validation and operational reporting.
- Created infrastructure documentation and standard operating procedures.
- Resolved Layer 2/3 issues involving DNS, DHCP, VPN, TCP/IP, routing, switching and VLANs.

Network Engineer Intern / *Toplyne*

Oct 2021 to Sep 2022

- Supported network monitoring, troubleshooting and day-to-day operations across Windows-based environments.
- Monitored system availability, network health and bandwidth utilization, and reported performance issues.
- Performed infrastructure health checks and preventive maintenance; maintained troubleshooting guides and inventory records.

PROJECTS

Network Validation & Automation Toolkit / *Python, Netmiko, Paramiko, Sockets, JSON*

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.
- Used SSH-based automation to collect device information and generate structured validation reports, reducing manual verification.

Security Intelligence Platform / *Python, FastAPI, React, JWT, YAML, MITRE ATT&CK*

- Built a platform that reads security logs in JSON, Syslog, CSV and plain text, detects the format automatically and turns them into readable findings.
- Added threat scoring, correlation of related events, MITRE ATT&CK mapping and NIST checks. Deployed it on Railway and Vercel from GitHub.

CERTIFICATIONS

- EC-Council Certified Cybersecurity Technician (C|CT)

EDUCATION

Master of Science in Computer and Information Sciences / *University of North Texas*

Dec 2024

Bachelor's Degree / *Lovely Professional University*

May 2022
