

TULASISAI PECHETTI

Network Engineer

Dallas-Fort Worth, TX | Open to Relocation & Remote | 940-600-3313 | Tulasisaipechetti@gmail.com
[linkedin.com/in/t-sai-pechetti](https://www.linkedin.com/in/t-sai-pechetti) | github.com/tulasisai | tulasisai.github.io

PROFESSIONAL SUMMARY

Network Engineer with experience across enterprise network operations, Layer 2/3 troubleshooting and Python-driven network automation. Works daily with TCP/IP, VLANs, routing, switching, DNS, DHCP and VPN, and builds Netmiko/Paramiko tooling to validate configurations and reachability at scale. M.S. in Computer and Information Sciences.

TECHNICAL SKILLS

Networking: TCP/IP, IPv4/IPv6, IP Addressing, Layer 2 Switching, Layer 3 Routing, VLANs, DNS, DHCP, VPN, Network Troubleshooting

Network Automation: Python, Ansible, Netmiko, Paramiko, Socket Programming, PowerShell, JSON, YAML

Monitoring & Analysis: Wireshark, Bandwidth/Latency Monitoring, Log Collection, Connectivity Validation

Security: VPN, Microsoft Defender for Endpoint, Conditional Access, MFA, MITRE ATT&CK, NIST

Systems: Windows Server, Windows 10/11, Linux, Active Directory, VMware, Microsoft Entra ID, Intune

Tools: Git/GitHub, GitHub Actions, ServiceNow, Jira, Microsoft Visio

PROFESSIONAL EXPERIENCE

IT Technician & Administrator | GNB Global Inc.

Dec 2025 – Present

- Support TCP/IP networking, DNS, DHCP, VPN, routing and switching for an enterprise of 200+ users and 190+ Windows endpoints.
- Troubleshoot connectivity issues end to end, from endpoint and identity (Entra ID, Conditional Access) through network services.
- Manage endpoint security (Microsoft Defender, BitLocker, Xcitium) and device compliance through Microsoft Intune.
- Develop PowerShell automation and maintain technical and network documentation.

Network & Automation Engineer Intern | Intelligenie

Jan 2025 – Dec 2025

- Troubleshoot Layer 2 and Layer 3 issues involving DNS, DHCP, VPN, TCP/IP, routing, switching and VLAN connectivity.
- Developed Python and PowerShell scripts for network validation, administrative automation and operational reporting.
- Built reusable Python test scripts for functional validation, log collection, result reporting and troubleshooting.
- Supported Windows/Linux infrastructure and produced infrastructure documentation and operating procedures.

Network Engineer Intern | Toplyne

Oct 2021 – Sep 2022

- Supported enterprise network monitoring, troubleshooting and day-to-day network operations.
- Diagnosed and resolved TCP/IP, DNS, DHCP, VPN, latency and connectivity issues to maintain network performance.
- Developed Python scripts to verify IP reachability, TCP connectivity and service availability, improving validation efficiency.
- Monitored network health and bandwidth utilization to identify and report performance issues.
- Performed Layer 2/3 troubleshooting involving IP addressing, routing, switching and VLANs.
- Worked with senior engineers on incident investigation and root-cause documentation; maintained network inventory records.

PROJECTS

Network Validation & Automation Toolkit | Python, Netmiko, Paramiko, Sockets, JSON

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.

- Used SSH-based automation to collect device information and generate structured validation reports, reducing manual verification.

Python Network Port Scanner / *Python, Socket Programming, TCP/IP, Multithreading*

- Built a multithreaded TCP port scanner with configurable port ranges and timeout handling to identify open/closed ports on remote hosts.
- Produced structured scan results for troubleshooting and basic security assessments of service availability.

CERTIFICATIONS

- EC-Council Certified Cybersecurity Technician (C|CT)

EDUCATION

Master of Science in Computer and Information Sciences / *University of North Texas* Dec 2024

Bachelor's Degree / *Lovely Professional University* May 2022
