

TULASISAI PECHETTI

Python Developer

Dallas-Fort Worth, TX | Open to Relocation & Remote | 940-600-3313 | Tulasisaipechetti@gmail.com
[linkedin.com/in/t-sai-pechetti](https://www.linkedin.com/in/t-sai-pechetti) | github.com/tulasisai | tulasisai.github.io

PROFESSIONAL SUMMARY

Python Developer who builds backend services, automation and data-processing tools. Designed and deployed a Security Intelligence Platform with FastAPI, REST APIs, JWT authentication and a React dashboard, and has written Python automation and test tooling in professional network and IT roles. M.S. in Computer and Information Sciences.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, PowerShell, HTML/CSS

Backend & APIs: FastAPI, REST APIs, JWT Authentication, JSON, YAML, Streamlit

Frontend: React, JavaScript, HTML, CSS

Data & AI: OCR, NLP, OpenAI API, Log Parsing, Schema Detection

Python Libraries: Netmiko, Paramiko, socket, threading/concurrency

DevOps & Cloud: Ansible, Git, GitHub, GitHub Actions, Railway, Vercel, Linux

Domain: Networking (TCP/IP), Security (MITRE ATT&CK, NIST), Microsoft 365 / Entra ID

PROFESSIONAL EXPERIENCE

Security Intelligence Platform Developer (Independent) / Self-directed Oct 2025 – Present

- Architected a Security Intelligence Platform that transforms heterogeneous security logs into explainable, evidence-based intelligence.
- Engineered adaptive log parsing for JSON, Syslog, CSV and text with automatic schema detection.
- Built FastAPI backend services, REST APIs and JWT authentication, plus React-based analyst dashboards.
- Implemented threat scoring, campaign correlation, MITRE ATT&CK mapping and NIST-aligned analysis.
- Designed a YAML-driven configuration architecture for runtime detection logic and enrichment.
- Deployed with GitHub, Railway and Vercel.

Network & Automation Engineer Intern / Intelligenie Jan 2025 – Dec 2025

- Developed reusable Python test scripts for functional validation, log collection, result reporting and troubleshooting.
- Built Python and PowerShell automation for network validation, administrative tasks and operational reporting.
- Documented tooling, infrastructure and operating procedures.

IT Technician & Administrator / GNB Global Inc. Dec 2025 – Present

- Develop PowerShell automation for IT operations supporting 200+ users and 190+ endpoints.
- Administer Microsoft Intune, Entra ID and Microsoft 365, and maintain technical documentation.

Network Engineer Intern / Topylne Oct 2021 – Sep 2022

- Developed Python automation for network monitoring, connectivity validation and log collection.
- Created Python test scripts to verify IP reachability, TCP connectivity and service availability.

PROJECTS

PDF Analysis Tool with AI, NLP & Automation / Python, OCR, NLP, SQL, Streamlit, OpenAI API

- Built an AI document-analysis app that extracts, processes and summarizes PDF content with OCR and NLP.
- Added conversational natural-language search over documents and automated ingestion, extraction and preprocessing workflows.

Python Network Port Scanner / Python, Socket Programming, TCP/IP, Multithreading

- Built a multithreaded TCP port scanner with configurable port ranges and timeout handling to identify open/closed ports on remote hosts.
- Produced structured scan results for troubleshooting and basic security assessments of service availability.

Network Validation & Automation Toolkit / *Python, Netmiko, Paramiko, Sockets, JSON*

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.
- Used SSH-based automation to collect device information and generate structured validation reports, reducing manual verification.

CERTIFICATIONS

- EC-Council Certified Cybersecurity Technician (C|CT)

EDUCATION

Master of Science in Computer and Information Sciences / *University of North Texas*

Dec 2024

Bachelor's Degree / *Lovely Professional University*

May 2022
