PROFESSIONAL SUMMARY

Network Support Specialist who triages incoming support calls, sets impact and severity quickly, collects the right technical details and resolves simple issues on the spot. Escalates complex cases with full context so engineers can start right away. Works with switching, routing, Wi-Fi, firewalls and VPN, including UniFi gear. M.S. in Computer and Information Sciences from the University of North Texas, EC-Council C|CT.

TECHNICAL SKILLS

Networking: UniFi Network, UniFi Access Points and Switches, Wi-Fi Troubleshooting, VLANs, DHCP, DNS, NAT, Port Forwarding, Site to Site VPN, TCP/IP

Security: Microsoft Defender for Endpoint, Conditional Access, MFA, MITRE ATT&CK, NIST

Monitoring & Analysis: Packet Capture (Wireshark), Log Collection, Ping and Traceroute, Wireshark, Bandwidth/Latency Monitoring, Connectivity Validation

Tools: Zendesk, Salesforce Service Cloud, Jira, Call Triage, Escalation Notes, Git/GitHub, GitHub Actions, ServiceNow, Microsoft Visio

Network Automation: Python, Ansible, Netmiko, Paramiko, Socket Programming, PowerShell, JSON, YAML

Systems: Windows Server, Windows 10/11, Linux, Active Directory, VMware, Microsoft Entra ID, Intune

PROFESSIONAL EXPERIENCE

IT Technician & Administrator / GNB Global Inc.

Dec 2025 to Present

- Take incoming support calls and tickets, set the impact and severity early, and set clear expectations with the caller.
- Gather the details engineers need, such as device models, firmware, topology, logs and packet captures, before escalating.
- Resolve straightforward Wi-Fi, switching, DHCP, DNS and VPN issues on the first contact.
- Escalate complex cases with clear notes so the next engineer does not need to ask the same questions.
- Manage UniFi access points and switches plus the office firewall, VLANs and guest network.

Network & Automation Engineer Intern / Intelligenie

Jan 2025 to Dec 2025

- Supported client networks and resolved Layer 2 and Layer 3 issues with routing, VLANs, NAT and VPN.
- Wrote Python scripts to collect device status and configs for troubleshooting.
- Documented common fixes for the support team.

Network Engineer Intern / Toplyne

Oct 2021 to Sep 2022

- Supported enterprise network monitoring, troubleshooting and day-to-day network operations.
- Diagnosed and resolved TCP/IP, DNS, DHCP, VPN, latency and connectivity issues to maintain network performance.

PROJECTS

Network Validation & Automation Toolkit / Python, Netmiko, Paramiko, Sockets, JSON

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.

Security Intelligence Platform / Python, FastAPI, React, JWT, YAML, MITRE ATT&CK

- Built a platform that reads security logs in JSON, Syslog, CSV and plain text, detects the format automatically and turns them into readable findings.

EDUCATION & CERTIFICATIONS

Master of Science in Computer and Information Sciences / University of North Texas

Dec 2024

B.Tech in Computer Science and Engineering / Lovely Professional University

May 2022

EC-Council Certified Cybersecurity Technician (C|CT)
