PROFESSIONAL SUMMARY

Lab and Data Center Technician with hands-on rack and stack, network cabling, device auditing and ticket queue work. Builds and cables test topologies for engineers, connects to gear over SSH and console, and supports VMware, Windows and Linux systems. Gives users remote lab access through SSL VPN, RDP and VNC and keeps documentation current. M.S. in Computer and Information Sciences from the University of North Texas, EC-Council C|CT.

TECHNICAL SKILLS

Networking: Rack and Stack, Structured Cabling (Copper, Fiber, DAC), Cable and Connector Types, Console and SSH Access, Network Topology Builds, IP Address Management

Systems: VMware vSphere, VMware Horizon View Client, Windows Server, Linux, RDP, VNC, SSL VPN, Windows 10/11

Tools: ServiceNow, Jira, Asset Auditing, Lab Documentation, Power and Cooling Monitoring, Git/GitHub, GitHub Actions, Microsoft Visio

Security: Microsoft Defender for Endpoint, Conditional Access, MFA, MITRE ATT&CK, NIST

Network Automation: Python, Ansible, Netmiko, Paramiko, Socket Programming, PowerShell, JSON, YAML

Monitoring & Analysis: Wireshark, Bandwidth/Latency Monitoring, Log Collection, Connectivity Validation

PROFESSIONAL EXPERIENCE

IT Technician & Administrator / *GNB Global Inc.*

Dec 2025 to Present

- Rack, stack and cable servers, switches and firewalls, and label every port and patch so the documentation matches the room.
- Audit physical and virtual devices each quarter, checking connections, serial numbers and IP addresses against the inventory.
- Give staff and contractors remote access through SSL VPN and RDP and fix connection problems quickly.
- Work the ticket queue daily, assign requests to the right person and follow up until each one is closed within SLA.
- Troubleshoot network outages over SSH and console, starting with cabling and link status before escalating.
- Support VMware hosts plus Windows and Linux servers, including VM builds, snapshots and patching.

Network & Automation Engineer Intern / *Intelligenie*

Jan 2025 to Dec 2025

- Built and cabled lab network topologies for testing automation scripts against real switches and routers.
- Wrote Python scripts that pull device inventory, serials and interface status over SSH for audits.

Network Engineer Intern / *Toplyne*

Oct 2021 to Sep 2022

- Supported enterprise network monitoring, troubleshooting and day-to-day network operations.

PROJECTS

Network Validation & Automation Toolkit / *Python, Netmiko, Paramiko, Sockets, JSON*

- Automated Layer 2/3 validation: IP connectivity, interface status, routing tables, VLAN configuration and reachability.

Security Intelligence Platform / *Python, FastAPI, React, JWT, YAML, MITRE ATT&CK*

- Built a platform that reads security logs in JSON, Syslog, CSV and plain text, detects the format automatically and turns them into readable findings.

EDUCATION & CERTIFICATIONS

Master of Science in Computer and Information Sciences / *University of North Texas*

Dec 2024

B.Tech in Computer Science and Engineering / *Lovely Professional University*

May 2022

EC-Council Certified Cybersecurity Technician (C|CT)
